

PULI TRADING

THE OPPORTUNITY

An investor's best friend

www.pulitrading.com

OVERVIEW

Puli Trading offers a **unique automated trading opportunity**. We are under management by MCI Global Investments (FCA regulated) and operate as an Alternative Investment Fund, on the FCA register. Our CEO Reuben is a registered Investment Manager on the FCA. Please see our website for links.

Our system trades on the Foreign Exchange market via a highly complex automated algorithm. You can benefit from copying all of our trades via a PAMM (percent allocation management module) account through our chosen Broker. You don't need any prior trading experience. Once set up, you can sit back and see our trades **copied directly** to your account.

We have made it as simple as possible to get started. Here are the key steps:

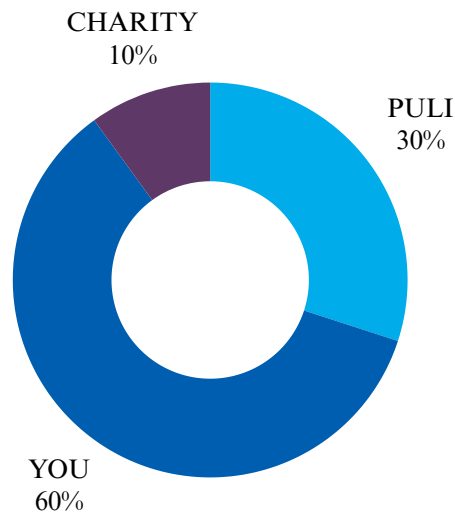

STEP 1: Create an account via our website www.pulitrading.com

STEP 2: Sign up to our regulated Broker Blueberry Markets

STEP 3: Deposit funds and subscribe to Puli Trading PAMM

STEP 4: Sit back and watch the results show in your balance

The **profit share** split is as follows:

We also give 10% of our profits to [Hope For Justice](#), an incredible Charity rescuing victims of Human Slavery and Trafficking.

WHY PULI?

We are **unique**. Not only are we transparent and show all trading results live via 3rd party trading statistic software (myfxbook - view through our website), but we also have ensured that you are protected as much as possible. We manage risk with every trade our system takes using stop losses (predetermined loss levels per trade)

Our system is **backtested rigorously** with decades of data and has live trading history visible via myfxbook (link on our website under “Our History”). We have dedicated support should you need any help along the way, and our broker has 24/7 customer support too. We have **regular live Zoom calls**, to showcase the opportunity and update clients, presented by the team. Sign up via our website.

Furthermore, with Puli Trading **you are in control**. We cannot prevent or block withdrawals at any time. You are in control of your money from the beginning, just as it should be.

If you would be interested in becoming an introducer please contact us at partners@pulitrading.com to see if you are eligible.

In everything we are doing from trading to business, we aim to operate with **transparency and integrity**.

OUR BROKER

Blueberry Markets are our chosen broker. We have specifically chosen them for the following reasons:

- Established for 7 years
- Regulated in Australia and Vanuata
- 5 Star Trustpilot rating
- Offer various methods of depositing (regulated)
- Money is stored in a regulated holding company called Currencycloud
 - A UK, EU and Canadian regulated holding company owned by Visa

We have gone to great lengths to make sure the broker we have partnered with shares the same **values** as we do. We are excited to be partnered with a Broker who cares for their clients and has a passion to provide excellent service.

TRADING

AUD/CAD	EUR/AUD	USD/CAD	CAD/CHF
CHF/JPY	EUR/USD	USD/CHF	CAD/JPY
NZD/JPY	USD/JPY	EUR/GBP	AUD/NZD
NZD/USD	XAU/USD	GBP/JPY	SGD/JPY

There are 16 Foreign Exchange pairs traded. We have tested over **5,000 combinations of strategies** along with these pairs to ensure we have the right mix. By diversifying the currencies traded and having Gold in the portfolio (XAU/USD) we are able to manage risk more effectively whilst seeking out profitable trades. Regardless of market conditions, the strategy is able to seek out opportunities and execute trades.

At Puli Trading we ensure that **risk is managed** as much as is possible. Every trade has a set predetermined stop loss and take profit. There is no use of martingale, grid trading or risky HFT scalping strategies. Our strategy has been created with long-term success in mind.

Our live results can be viewed on our [website](#) which will take you to our 3rd party verified tracking page.

THE PULI TEAM

Started by **Reuben Mattinson**, (CEO), Puli Trading is the realisation of years of hard work and dedication. Reuben has a decade of experience in the automated Forex industry and has a highly successful business in the e-commerce sector rated 5-star on Trustpilot. His dedication to seeing the vision of having an automated strategy trading in the Forex market, along with a transparent, ethical and sustainable opportunity for clients has driven Puli to become a reality.

Paul Seely, (CTO) brings almost a decade of trading and technical analysis experience to the team. He has traded and analysed Forex Markets and also specialises trading E-Mini S&P500 futures. He oversees the trading operations and will be bringing Forex education, trading analysis and further assistance to Puli Trading clients. Furthermore his 1st-Class Degree in Business & Management along with a decade of business experience will prove useful to helping Puli Trading operate effectively and efficiently.
